Erratum

In the November 1990 issue of *MBE* the number line was incorrect for figures A1 and B1 of the article “Tetrapod Phylogeny Inferred from 18S and 28S Ribosomal RNA Sequences and a Review of the Evidence for Amniote Relationships” by S. B. Hedges, K. Moberg, and L. R. Maxson; there are 140 nucleotides per line instead of 150.
