Announcements

A free newsletter devoted to the presentation of new results and techniques related to the study of historic and ancient DNA is forming. Brief 500-word abstracts of research findings and 1,000-word descriptions of new approaches or techniques can be submitted by E-mail or sent by post to the address below. To obtain more information or to be placed on our mailing list, please write to Dr. Robert K. Wayne, Head of Conservation Genetics, Institute of Zoology, Zoological Society of London, Regent’s Park, London NW1 4RY, England. Telephone: 011-44-71-722-3333 (9-5 P.M.), extension 831, or 011-44-71-586-3011 (direct line). FAX: 011-44-71-586-2870. E-mail: R.Wayne@UK.AC.UCL (JANET) or R.Wayne@UCL.AC.UK (Internet).

On June 11–14, 1992, the Institute of Molecular Evolutionary Genetics, Pennsylvania State University, University Park, Pa., will sponsor an international conference on molecular evolution, organized by Masatoshi Nei, Andrew G. Clark, and Thomas S. Whittam, under the auspices of the Alfred Sloan Foundation. It consists of sessions of invited speakers and poster sessions and is intended to foster discussions among biologists interested in the most recent advances on the interface of molecular biology and evolution. The program of the conference is as follows:

3. Poster session.

6. Poster session.

Clades of Placental Mammals”; S. Horai (Mishima, Japan), “Evolution of Mitochondrial DNA in Human Populations”; and panel discussion.

If you are interested in attending the conference, please contact Jack Sinclair, Conference Coordinator, The Pennsylvania State University, 409 Keller Conference Center, University Park, Pennsylvania 16802; phone (814)863-2035; Fax (814)865-3749.
