Announcement of Reduced Page Charges

Authors of papers that are published in Molecular Biology and Evolution are currently charged $35 per published page. Beginning with papers that appear in the January 1996 issue, the charge will be reduced to $30 per published page if the final revised version of the manuscript is accompanied by an electronic version on a 3.5-inch computer disc that has been formatted either for Macintosh or DOS, and with files in whatever word-processing format is preferred. Note that authors must provide hard-copy versions along with the electronic versions.

Page charges will not normally be waived unless an electronic version of the manuscript is provided.
